

Assignment Title: PC Brand Analysis Report

Mobile Brand: Acer Predator

Name: Simegnaw Tagele

ID : 1602438

Instructor: Lec. Alemitu

University: Bahir Dar Institute of Technology

(Bit)

Submission date: Jan 2026

Brand Overview

- Acer Predator is a premium gaming PC and laptop brand by Acer Inc.
- Origin: Taiwan
- Target users: gamers, content creators, power users
- Known for high-performance hardware and aggressive gaming design

1. Hardware Quality & Performance

Core Components

- Uses Intel Core i7 and i9 processors (12th, 13th, and 14th generation)
- Some models use AMD Ryzen 7 and Ryzen 9 processors
- CPU performance is very high but power consumption is also high
- Dedicated NVIDIA GPUs such as RTX 3060, 3070, 4060, 4070, and 4080
- Suitable for high-end gaming and workstation tasks
- RAM type includes DDR4 and DDR5 with upgrade support

- 
- Storage uses NVMe SSDs with PCIe Gen 3 and Gen 4 speeds
 - Storage capacity ranges from 512GB to 2TB

2. Thermals & Noise

- Advanced cooling system using AeroBlade 3D fans
- Heat dissipation is effective during heavy workloads
- Fan noise is noticeable under gaming or rendering load
- Minimal thermal throttling when cooling system works properly

3. Build Materials & Durability

- Combination of metal and high-quality plastic chassis
 - Build quality is solid and durable
 - Hinges are strong and reinforced
 - No official MIL-STD durability certification
 - Suitable for long-term gaming usage
- 

4. Design & Ergonomics

- Heavy design, not very portable
- Weight ranges between 2.5 kg to 3 kg
- RGB backlit gaming keyboard
- Good key travel for gaming and typing
- Trackpad is smooth and accurate
- Traditional hinge design
- Aggressive gaming-oriented aesthetics

5. Display Quality

- Display resolutions include Full HD, QHD, and 4K
- IPS panels are commonly used
- Some models offer Mini-LED displays
- Brightness ranges from 300 to 500 nits
- Color accuracy up to 100% sRGB or DCI-P3
- High refresh rates such as 144Hz, 165Hz, and 240Hz
- Touchscreen is generally not available

6. Reliability & Brand Reputation

- Acer Predator has a strong reputation in gaming market
- User reviews are generally positive for performance
- Reliability is good with proper maintenance
- Repairability is moderate
- Long-term performance consistency is good

7. Battery & Power Efficiency

- Battery life is average
- Provides around 4-6 hours on light usage
- Battery drains quickly during gaming
- Fast charging support available
- Power adapter is large and heavy

8. Software & Ecosystem

- Runs on Windows 11
- Comes with some preinstalled bloatware
- PredatorSense software for performance control and RGB
- Driver stability is good
- Regular software and driver updates

9. Security Features

- BIOS and UEFI security available
- TPM supported
- Fingerprint reader available in limited models
- IR camera for Windows Hello in some models
- BitLocker encryption supported
- 10. Upgradeability & Repairability
- RAM is upgradable
- Extra SSD slot available in many models
- Battery replacement is possible but difficult
- Moderate repair restrictions
- Internal components are fairly accessible

11. Connectivity & Ports

- Multiple USB-A ports
- USB-C with Thunderbolt 4 support
- HDMI 2.1 port
- Display output via USB-C
- Ethernet port available
- Wi-Fi 6 and Wi-Fi 6E supported
- Bluetooth 5.2 supported

12. Price & Value

- Price range starts around \$1000 and goes above \$3000+.
- Price-to-performance ratio is excellent for gaming
- Long lifespan value due to powerful hardware
- Multiple configuration options available
- Discounts available during sales

13. Customer Service & Warranty

- Standard 1-year warranty
- Extended warranty options available
- On-site service support in many regions
- Support quality is average to good
- Accidental damage protection available

14. Special Use-Case Evaluation

For Gaming

- High-end RTX graphics
- Strong cooling system
- High refresh-rate display
- RGB customization features

For Business

- High performance but heavy
- Average battery life
- Not ideal for corporate usage

For Creative Work

- Powerful CPU and GPU
- Color-accurate display
- Thunderbolt support

For Students

- Suitable for gaming and engineering students
- Heavy to carry daily
- Expensive for basic academic use

Conclusion

Acer Predator is best suited for gaming and high-performance tasks

Excellent graphics and processing power

Weak battery life and portability

Ideal for gamers and power users
